

TRUE QUALITY IS THE PRODUCT OF WHAT YOU PUT INTO IT.

SHARE YOUR PASSION.

Product quality always begins at source – with procurement. That's why it takes people with an uncompromising sense of standards, an exceptional mindset and a real feeling for quality to procure the most suitable materials for each and every part of our vehicles. But the job doesn't just end there. In their pursuit of uncompromising quality, our teams are tasked with ensuring all the materials they source continue to drive more sustainable and efficient production methods too.

Manager Semiconductor Supplier Quality (f/m/x)

What awaits you?

- You will work with semiconductor suppliers in the Asia Pacific region to make sure that BMW can utilize robust semiconductor solutions. The adherence of the entire semiconductor supply chain (Wafer Manufacturing, Assembly and Test) to respective standards (ISO, IATF-16949, VDA, BMW Group Standards) plays a central role in this context.
- Assessment of suppliers with respect to those requirements as well as the closing of potential gaps will define your daily work.
- Furthermore, you will be responsible for problem solving activities in case of shortcomings of semiconductor solutions.
- You will support the global BMW Semiconductor Management organization with local presence and a strong relationship to semiconductor suppliers in the Asia Pacific region.

What you should bring along?

- At least Engineering Degree in Electrical Engineering, Physics, Chemical or any related field
- Profound work experience in quality management and/or semiconductor manufacturing
- Project management experience together with profound project leadership experience
- Profound knowledge in the areas of semiconductor technology and processes electronics as well as related manufacturing processes
- Experience regarding the use of quality management systems
- Safe command of MS Office
- Full professional proficiency regarding English language
- Flexibility, ability to work under pressure and resistance to conflicts
- Competence regarding working in an intercultural work environment and with other cultures
- Ability to think analytical and structured working style
- Readiness to travel internationally
